

G
NEER°C

G NEER°G

Return to pure nature to find a paradise for tired modern people.
We look for unpolluted natural footprints in the Earth's long history,
and study its infinite possibilities.

Find the root of life that supports us and present that great & pure energy to our skin.

We travel green earth for skin relaxation.

NEER°G, which looks like earth, always miss or draw the nature.

01

Go back to nature

When was it?
We rewind lost time of nature.
Remember the power of green shoots. Or
feel the fresh wind with your body. Then
there'll be a small change for you.

We travel all over the world in Search of
unspoiled nature. Glacial water of the Arctic
as old as the earth. Deep sea water flowing out of
reach of the sun.
Feel the pure energy for your skin

Commune with nature

02

03

Close to natural

We always embrace nature in our hearts
as we see and listen to it.
A woody flavor and odor,
moist early morning dew to make
us comfortable. Relax in the nature.

Deep Sea Water Line with freshness

The clean sea area in the northernmost part of the East Coast, with a depth of 605m, deep ocean water contains the mineral, supplying moisture to dry skin while discharging the wastes from the skin, helping skin circulation therapy.

Since sunlight does not reach and does not mix with the surface water, there are almost no organic matter or bacteria, and its rich mineral content not only absorbs moisture into the skin quickly, but is absorbed into the skin quickly and penetrates without stickiness.

Clear and clean skin care with blue & pure SEA energy.

- NEER®G DEEP SEA WATER TONER
- NEER®G SEA SALT DEEP CLEANSING FOAM

**Osmotic pressure function by sea salt cleans pores.
& Moisturizing and soothing effect of deep sea water.

Happy Sunny Vitalizing line

Citrus Sinensis (Orange) Fruit Water

Blood orange is a type of orange that contains abundant "anthocyanin" components, which are the representative antioxidant components, and has a reddish black color that stands out more than other species. It is richer in Vitamin C than any citrus on the planet and gives a transparent vitality to dull skin, and at the same time helps reduce dull melanin and dullness. In addition, the excellent antioxidant effect of blood orange has already attracted attention in foreign SCI (E) grade papers, and it has already been selected as one of the "1001 ingredients in the world that must be eaten before dying". Widely accepted.
